

a Conservative claim matrix

C1	Native learned promotion improves reward and wai
C2	Native real AFC/APC demand improves score/reward
C3	Large L2/L3 order-book replay path exists
C4	Advanced encoder evidence spans Quant and Transi
C5	Leakage no-tradeoff holds beyond surrogate
C6	Formal theory appendix covers main protocol clai
C7	Native promotion reward/wait improvement replica
C8	Strong baseline and ablation table supports freq
C9	Pressure validation covers stationary, burst, pe

b Baseline ablation: Sharpe deltas

c Registered stress regimes

d Evidence accounting
